

# SOLID-CORE CURRENT TRANSFORMER

## J3CT090-XXX-333mV

J3CT series of solid-core current transformer offers 333mV at secondary from sensed primary current. Without using secondary CT inside of meter, users directly connect J3CT series to a meter for high accuracy metering application. It enables one meter to be adopted for various current rating by only changing primary CT so it makes compact design meter and reduces developing cost.
