## [ What is J&D? ]

### ◆ Our Mission ◆

Our mission is to create and provide the high quality current sensing technology and power quality equipment that enables the efficient use of electricity throughout the world.

### ◆ Our team ◆

We are staffed by a team of highly qualified design engineers, software and firmware engineers, applications engineers, production technicians and sales and support specialists all with a common.

### ◆ Our products ◆

We are leading the market, providing innovative and high quality solutions for measuring electrical parameters. Our product line card is mainly used in abroad range of applications such as sub-metering, Distributed energy resources and DC Microgrid businesses.

### ◆ Our Objective ◆

We meet our customer's needs with reliable and accurate products at a reasonable cost, with the highest level of professional service.
